

Assembly SMART-HEAVY-PAC [SHP]

1. Folded SHP.

2. Remove lid, if needed remove divider shelf SHS.

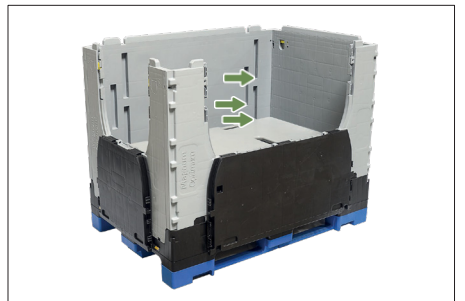

3. Erect both long sidewalls one after the other.

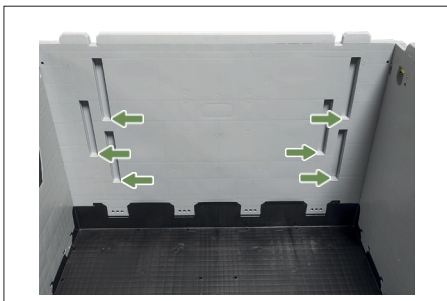

4. Erect both short sidewalls one after the other and lock into long sidewalls.

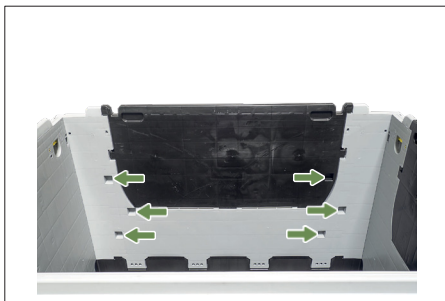

5. For better loading, open the flap doors by pushing the flap doors inwards and then pulling them upwards.

6. The internal volume of the SHP can optionally be divided into two and three areas with two divider shelves.

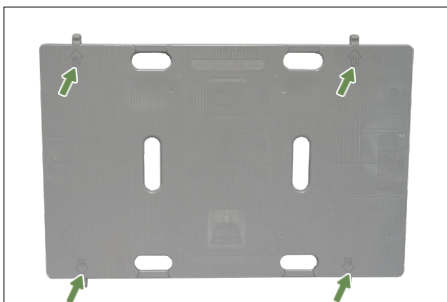

7. Inserts for the pins of the divider shelves in the inside of the rear wall.

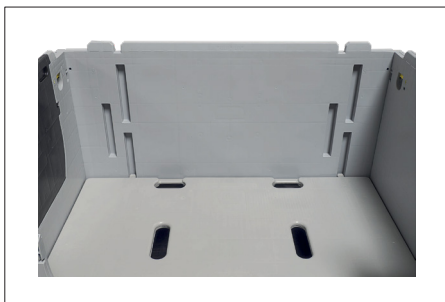

8. Inserts for the pins of the divider shelves in the inside of the front wall.

9. The divider shelf must always be put first into the inserts in the front wall, then you can put it into the long inserts in the rear wall.

10. Inscriptions are attached to the divider shelves to explain, how the divider shelf must be inserted.

11. Plugged in divider shelf.

12. After filling process flap doors are closed and lid is placed.
